### Definitions:

- **Shelf Life:** The time frame within which material must be transformed by a manufacturing process (used, cut, assembled, etc.). The “Shelf Life” is not passed on to the end product (No longer applicable once the product has been transformed).
- **Expiry Date:** Date after which goods will no longer perform as intended even when incorporated in an assembly. The “Expiry Date” will be applicable to the component itself and/or transferred to the end product.
