

TULMAR

LIFERAMP RESCUE SYSTEMS

EASY TO SETUP - FITS ON YOUR VEHICLE

When time is of the essence, the LifeRamp is the ideal product to deploy. The product is compact and can be carried on fire trucks, the trunk of a car or on board your power boats. Inflating in seconds, this rescue platform lets you access trapped victims when there is no time to wait. After a deployment, the rescue platform can be re-packed at your station. No need to send this off to be serviced by a third party. This saves your department or agency time and money.

The 10 foot LifeRamp is 12" X 22" X 55" when packed in its valise.

VERSATILE RESCUE PLATFORM

Water • Ice-Water • Unstable Terrain

FEATURES

- High-performance, rugged material allows for variety of deployment methods
- Rigid and stable platform to ensure rapid evacuation of multiple victims
- Rapid inflation with air from a SCBA tank (tank not included)
