## LIFERAMP RESCUE SYSTEMS

### **EASY TO SETUP - FITS ON YOUR VEHICLE**

LifeRamp is ideal for use where most rescue systems become unsafe — on land or in a watercraft. Its tough neoprene chamber inflates in 8 to 12 seconds to get your rescue team onto the water fast! Using a ramp-to-ramp coupling line, two LifeRamp platforms of similar length can work in tandem to leap from ice floes or get around obstacles and reach victims by the shortest possible route. The LifeRamp is compact and available in 5 different sizes designed to fit in your boat or truck.

Model	Configuration	Weight
LR-10'	Dual Chamber	28 lbs
LR-15'	Dual Chamber	42 lbs
LR-30'	Dual Chamber	78 lbs
LR-50'	Dual Chamber	90 lbs
LR-80'	Dual Chamber	190 lbs

# VERSATILE RESCUE PLATFORM

Water • Ice-Water • Unstable Terrain

## FEATURES

- High-performance, rugged material Rugged material allows for variety of deployment methods
- Rigid and stable platform to ensure rapid evacuation of multiple victims
- Rapid inflation with air from a SCBA tank (tank not included)
- Multiple attachment points
- LifeRamp systems can be tethered together to extend reach
- Compact storage system to fit land or marine vehicles
- Available in 5 sizes to meet your operational requirements (10, 15, 30, 50 & 80 ft)

## STANDARD COMPONENTS

- Full wrap-around grab lines
- Stainless steel D-rings for towing
- Pivot lines
- Emergency repair kit
- Socket tool for removal of air check valve
- Carrying valise
