

TULMAR

ENGINEERED FOR PROTECTION

AEROSPACE SOLUTIONS

Aerial Delivery Systems
Aviation Restraints
Cargo Pallet Nets
Life Support Equipment
Tie-down Equipment
Lightweight Torpedo Recovery System

TACTICAL FLOTATION

Tactical Lifejackets
Backpack Assault Boats
Inflatable Ramps
Submarine Life Rafts

VEHICLE & GROUND SYSTEMS

Camouflage & Concealment
Cargo Control
Protective Covers
Soft-walled Shelters
Vehicle Seating & Restraints

Tulmar's capabilities encompass Design & Development, Strategic Sourcing, High-Quality Manufacturing, MRO and Life Cycle Management. We deliver the flexibility your defence procurement program demands.

TULMAR

SOLID LINK IN THE DEFENCE SUPPLY CHAIN

Our partnerships deliver exceptional value and proven solutions

VEHICLE & GROUND SYSTEMS

Tulmar's ongoing strategic supply relationships with GDLS, BAE Systems, and Rheinmetall Defence provide seating solutions, stowage and carriage equipment and protective covers for wheeled armored vehicle, military truck and weapons programs. The interior stowage components of the Marine Corps Re-Armoring project were designed and built by Tulmar under contract to Armatec Survivability Corp. We deliver tent and shelter components directly and through system integrators such as Weatherhaven and AAR Mobility Systems.

Tulmar brings the capabilities of AmSafe, the world's leading provider of safety and securement products for aerospace and ground transportation to the Canadian Defence community. AmSafe Defense restraints are specifically designed and tested for military applications. These restraints are currently fielded on the LAV, Stryker, HMMWV and other vehicles used in theater worldwide.

AERIAL DELIVERY & RESTRAINT SYSTEMS

Tulmar offers a comprehensive AmSafe Bridport product range that includes Arrestor Barrier Nets, Helicopter Under-Slung Load Equipment (HUSLE), Camouflage Concealment & Deception (CCD), Engineered Cargo Restraint Systems, Torpedo Recovery Systems and more. AmSafe Bridport's product range, coupled with hundreds of years' experience, is at the forefront of technical textile products designed to catch, carry and protect. Tulmar and Bridport - a natural partnership linking world-class products with capabilities.

INFLATABLE TECHNOLOGY

Tulmar's aviation life rafts are in service aboard Canadian military transport aircraft, both rotary and fixed wing. We provide life preservers to all branches of service. We have adapted our 6-man aviation raft for submarine stowage to provide a surface abandonment capability for Canada's submarine fleet. From helicopter float bags to towable marine targets, we continue to explore advanced solutions incorporating inflatable technology for defence requirements.
