

LIGHT WEIGHT PORTABLE GIRT TRAINER

A welcomed addition to your classroom!

Tulmar's dual-purpose classroom girt trainer was developed to replicate the inflation of an evacuation slide on one side as well as practicing detachment of the slide-raft from the aircraft on the opposite side.

The unique girt trainer provides a realistic slide activation pull force closer to what cabin crew would encounter in a real emergency situation.

The classroom girt trainer is made to provide you the mobility and flexibility you need. It is easy to carry and set up where you need it to be, beside your simulators or in a classroom environment.

<- Lacing to simulate ditching

Portable Mode Preview

WEIGHTS & DIMS

5lbs & 4'L x 1'W
2.2kg & 122cm x 60cm

FEATURES

Uses realistic pull force for both "Pull to inflate" and "Pull to release slide".

Replicated motion (Pull movement sequence of actions).

Includes lacing under girt flap to replicate girt to slide attachment.

Anti-skid under the girt for training on multiple surface types

Handles on the back allow to fold the girt trainer into its own valise

Quick reset for back to back training (Resets in less than 20 second!)

Our training products replicate an OEM experience and are designed to provide durability and dependability.
