6412-001	Non-Latex Neck Piece

NON-LATEX NECK PIECE

The standard neck piece is the non-latex neck piece. Tulmar also offers latex or non-latex replacement neck pieces.

FEATURES

REALISM

The Tulmar Air Liquide-style PBE was designed specifically for cabin crew training. It was built to replicate the use of the real aircraft product but adapted to sustain the rigors of repeated training.

The training PBE comes complete with simulated activation system, weighed cylinder (ring) and a removable neck seal. The PBE is similar in shape, colour and weight to the OEM's.

EASE OF USE

The simulated activation system is simple to reset. Donning is as fast as the OEM PBE, complete in mere seconds.

DURABILITY

Tulmar uses robust materials that can withstand the rigors of the training environment.

WASHABLE

The PBE can be completely dismantled so the textile portion of the product can be placed into a conventional washing machine.

REPAIRABLE

Tulmar can provide repairs to textile portion of the PBE and provide replacement parts that experience wear through repeated use.
