
PRODUCT INFORMATION BULLETIN

BULLETIN #: PB-2011-01
ISSUE DATE: January 10, 2011
SUBJECT: **INFLATION SYSTEM UPGRADE AND PART NUMBER REVISION
FOR SUBMARINE LIFE RAFT**

Tulmar Safety Systems has upgraded the CO2 inflation system, vacuum pack and valise of the 6-man submarine life raft system, NSN 4220-20-002-9133. The part number change has no impact on the functionality and performance of the life raft, but will extend the inspection service interval to three years.

The part number of the new configuration is 61003.

Part number 61002 is no longer available for sale. Any 61002 life raft sent to Tulmar for service inspection and repacking will be converted to the new configuration and returned under the new part number, 61003.

Enquiries for additional information on the above should be directed to:
