

## NEXT GENERATION TACTICAL LIFE PRESERVER

### Adaptively Optimized for Tactical Operations

Developed from over 30+ years experience in the design and development of tactical flotation systems for maritime special operations forces and tactical law enforcement agencies.

- Streamlined low profile shooters cut allows unimpeded weapons handling, climbing, rappelling, fast roping, and confined space movement.
- Lightweight and highly compact, yet durable; built to withstand the rigors of tactical training and operational environment use.
- Provides up to 40lbs of self-righting buoyancy.
- Easily attaches and integrates with most MOLLE/PALS tactical armor systems.
- Re-arm and re-pack in less than 5 minutes under maritime operational conditions with no tools required.

Size	Universal
Weight	1.25lbs / 0.57kg
Inflation System	Automatic & Manual activated CO <sup>2</sup>
Buoyancy	Up to 40lbs / 180 N
Bladder	Standard Green & High Visibility

**T-BAR  
attachment  
system  
maximizes  
available MOLLE /  
PALS real-estate  
while securing  
life preserver to  
armor carrier.**

Ergonomic design allows full range  
of motion and weapons handling

#### Color Models

Black

Multicam

Ranger  
Green

Coyote  
Brown
