

GALEO

NEXT GENERATION TACTICAL LIFE PRESERVER

Adaptively Optimized for Tactical Operations

Developed from over 30+ years experience in the design and development of tactical flotation systems for maritime special operations forces and tactical law enforcement agencies.

- Streamlined low profile shooters cut allows unimpeded weapons handling, climbing, rappelling, fast roping, and confined space movement.
- Lightweight and highly compact, yet durable; built to withstand the rigors of tactical training and operational environment use.
- Provides up to 40lbs of self-righting buoyancy.
- Easily attaches and integrates with most MOLLE/PALS tactical armor systems.
- Re-arm and re-pack in less than 5 minutes under maritime operational conditions with no tools required.

Size Universal

Weight 1.25lbs / 0.57kg

Inflation System Automatic & Manual activated CO²

Buoyancy Up to 40lbs / 180 N

Bladder Standard OD Green & High Visibility Orange

Ergonomic design allows full range of motion and weapons handling

T-BAR attachment system maximizes available MOLLE / PALS real-estate while securing life preserver to armor carrier.

Color Models

Black

Multicam

Ranger Green

Coyote Brown
